GMC TRUCKS

A Demonstration Does It!

PROVES THE CASE "VAC" GIVES MOST FOR THE MONEY IN THE LOW-COST CLASS

Demand proof! Watch the Case Model "VAC" at actual farm work in direct comparison with any other tractor in its price class. Take them right down the line—plowing, disking, planting, cultivating, haying, combining, corn picking. Add up the score—not only for capacity per hour but for quality of work, too.

See for yourself how much work you can do with this 2-plow tractor—how the "VAC" has what it takes for plowing and other heavy drawbar work. Notice how its quick-dodge steering makes fast cultivation easy—how well you can watch what you are doing with its "look-forward" cultivator.

Count all the costs—investment, fuel, and especially upkeep—and see how little it costs to operate the "VAC." The "VAC" has MORE ENGINE than any other four-cylinder, four-speed tractor in its class. It works at lower piston speed—pulls still stronger when slowed down. Just let us prove its performance at your own work, in your own soil.
