## Pioneers Nip Canby 38-37 As Game Ends

### Gene Cyphers Hits Winning Bucket With Only 5 Seconds Left

Sandy high's Pioneers snatched a victory from almost certain defeat Tuesday evening when Sophomore Gene Cyphers tossed in a 20-foot one-hander with only 5 seconds left in the game to defeat Canby 38-37 on the latter's home floor, in the opening Willamette Valley league contest for both schools.

For Coach Henry Pete's basketball crew it was the second victory in four starts for the young 1950-51 season, and the first victory in Willamette Valley league competition.

It was a nip and tuck battle throughout the second half, and especially during the final three minutes. Wayne Frederickson tossed in a free throw with only a minute left to break a 35-35 deadlock, but Morgan of Canby scored a lay-in with a half minute to go to give the home team a 37-36 lead and almost certain victory.

Then came the net-splitting bucket of young Cyphers to snatch victory from Canby's high-riding basketekers. Wayne Frederickson won high point honors with 11 and runner-up honors went to Kleve, Canby forward, with 10. Other Sandy scorers included Barney Krom (9), Don Gomoll (7), Raymond Lekberg (5), Jack Anderson (2), Bill Frederickson (2), and Cyphers (2).

Sandy held a first quarter advantage of 8-5, and 24-19 at the half, but faltered in the third period and trailed 30-31 going into the final frame. The Pioneers had a poor evening at the free throw line, making 8 out of 25 attempts. Canby made 15 out of 24 attempts.

In the preliminary Pioneer jayvees coasted to an easy victory over the Canby juniors, 31-28. The locals built up an 8-1 first quarter lead and held a comfortable 17-8 halftime advantage.

Koch topped the Pioneer scorers with 10 points but high game honors went to Kraft, Canby guard, who potted 14 points, exactly half of the Canby total.

## "Flashing Blue" Denotes Danger, Motorists Warned

The secretary of state's traffic safety division joined the state highway commission today in warning Oregon motorists of danger ahead when a flashing blue light is seen on wintry highways.

The blue light, the division said, signals that snow plowing and sanding equipment is at work and that drivers should proceed with extra caution. Such equipment may be encountered at any time in mountain areas during the winter months.

Vehicles displaying the blue light should be given the right of way, the division said, and no attempt to pass should be made in flying snow while the big rotary plows are in operation. Highway department officials said most mishaps involving snow removal equipment occur when motorists overdrive visibility and road conditions, failing to stop or slow down in time to avoid a collision.

However, Santa will be laden with gifts for everyone, Mr. Mainey declared, as he and his helpers prepared over 600 packages for the party last weekend.

Meanwhile, merchants of Sandy reported a brisk business in Christmas sales as the shipping tempo increased with fewer shopping days remaining. The Sandy Post Office has been deluged all week with Christmas mail and has worked long hours to insure prompt distribution to Sandy residents.

## Strawberry Growers Study Above Average Production

Strawberry growers in Clackamas county are cooperating in a production survey in order to find factors which influence above average yields of strawberries. The survey is in cooperation with Oregon State college, U.S.D.A. and Leon Garioian, county extension agent.

The survey was suggested by the county's small fruits advisory committee headed by Glen Schaeffer, Kelso district strawberry grower.

"Object of the survey," according to Mr. Schaeffer, "is to find out how important are factors such as time of planting, soil preparation, fertilization, source of plants, depth of cultivation and plant storage."

"To successfully remain in the strawberry growing industry, it is important that we be able to produce yields high enough to compete with neighboring states. It is the purpose of this questionnaire to find out how some growers are consistently getting high yields," states Mr. Garioian.

As soon as questionnaires are returned to the extension office, they will be summarized by George Waldo, U.S.D.A. strawberry plant breeder and Mr. Garioian. Summaries will be presented to growers at the regular winter meeting for small fruit growers.
