SANDY CATCHALL

By Martin Clark

Too hot to do much of anything last weekend, so figured you'd just as soon refresh yourself with this tidbit of Sandy femininity. Much easier just lookin' than settling down to reading a column. Besides, couldn't get fresh dirt on anyone, and everyone knows all the old dirt.

On one of those sultry days last week I dropped over next door to Barker's for my afternoon shake (milkshake, that is)

to keep mah strength up. While Ah was sittin' there renewing my lease on life for the afternoon, a little fellow comes in with his dad and sits on the stool next to mine. Now, I wouldn't have noticed this little guy much except that in his left hand he was holding a weiner, which he was chawing a hunk out of at regular intervals.

I STILL wouldn't have paid much attention except that the

next time I turned around, there he was still gnawing away at the weiner, only now he had an ice cream cone in his right hand and was alternating his intake between the two: a bite of the weiner, a suck on the cone, a bite of the weiner . . . you get the idea.

It was so intriguing, I almost forgot my shake. Sorta like a pendulum . . . the weiner, the cone, the weiner, the cone . . .

The little boy's name was Dicky; his patient dad was John W. Steiner of Cherryville.

Just goes to show anything can happen in Sandy on a hot afternoon or . . . anything can happen in Sandy, period. •

Always A Queen

Wordsworth (or someone) said something about the "child is the father of the man" . . . looks as if it applies to little girls, too. In the photo at left is Maridine Crone when she was 11 years in the sixth grade. On the right is

QUEEN Maridine as she appeared when she reigned as sovereign of Sandy's Fourth Annual Strawberry Festival this June.

Gad, what a difference six years can make. Wish it had that effect on more of us.

From where I sit . . . by Joe Marsh

Well, What Do You Know?

Do you believe in a bunch of old tales about lightning—about how it's attracted by cats or the warmth of cattle . . . how it never strikes in the same place twice . . . or how it's liable to turn milk sour? Lots of people often do—but they're wrong.

Dad Hawkins inspired this column today. He's really studied up on lightning since his own cow barn was struck that time.

"Trouble is, most of us don't know half enough about the subject," Dad says. "And about half of what we do know is false!"

From where I sit, Dad's statement applies to a lot of things besides lightning. Too many people think they know their neighbor's wrong when he votes for his candidate instead of theirs. Some people even resent our right to enjoy a friendly glass of beer if and when we choose. Opinions based on misinformation and prejudice, instead of being "grounded" on true facts can cause more damage than lightning ever did.
