..Yours Automatically with a JOHN DEERE BALER

Put a John Deere Automatic Baler on the job and you'll turn out well-packed, wire-tied, sliced bales... easier and at lower cost than ever before.

It's a compact, automatic baler that hustles right along, baling from the windrow at the rate of 3 to 4 tons per hour. The windrow enters the baling case right from the power-driven pickup; there's no cross conveyor to take it "around the corner."

Tying is done neatly, speedily, and precisely with a minimum of wire and with no ends clipped to fall on the ground and find their way into the stomachs of your livestock.

Big capacity and sturdy construction make this an outstanding automatic baler. Let us point out to you the many plus values of the John Deere Baler. Come in the next time you're in town.
