New Type Strawberry To be Alloted Growers

A new strawberry selection as yet unnamed, designated U. S. Oregon 2172, is to be released to plant producers, says Martin B. Thingvold, Clackamas county agent. The plants released this year are to be propagated under foundation stock certification regulations. That means they will be subject to all of the rules and regulations of strawberry plant certification in Oregon.

There are a limited number of plants available, so they are to be allocated in lots of 500. The plants produced from this allocation will be sold to strawberry growers for planting in 1956. They will be sold in a manner determined by joint action of the propagators of strawberry selection 2172 and the plant allocation committee.

Strawberry selection 2172 is to be named jointly by the United States Department of Agriculture and the Oregon Agricultural Experiment Station sometime during 1955. From that time, the plants will have an official name.

Application forms for an allocation of 500 plants are available at the county agent's office in Oregon City. In order to qualify for an allocation of these plants, the grower must fill out the application blank listing his qualifications. Application must be made before January 15, 1955.

Black Stream Snails Host of Salmon Fluke

It takes about 4000 flukes to kill a trout 2-to-3 inches long, Dr. Ivan Pratt, Oregon State college zoology professor, has determined.

Dr. Pratt's latest research project is on how Troglotrema, the salmon-poisoning fluke, affects fish. This fluke affects all fish but salmon and trout draw the most attention because of their commercial and sports value.

Tall-spined, black stream snails are one of the hosts of the salmon fluke. Some streams have more than 100 snails a square yard. Sometimes more than half of the snails are infected.

Dr. Pratt has counted more than 2100 flukes which came from one snail in five hours. Flukes bore right through the skin of the tail and fins of salmon and trout to gain entry.

Dr. Pratt is using five kinds of fish in the experimental laboratory. They are trout, crappie, war mouth bass, fresh-water sculpin and salmon. C. E. Webb, superintendent of the state fish hatchery at Alsea, supplies trout, salmon and infected snails for the work.

Aims & Bull Run NEWS

By Elizabeth Haggstrom

Aims was privileged to view dies at the Sunday evening services. Miss Dessa Jackson, missionary to Cuba from Vancouver, B.C., also gave a very interesting and instructive talk. The Custus family sang a hymn, "Halleluiah, Christ is Mine," in Spanish. Mrs. Dunlop, accompanied by Mrs. Weeks, sang a solo.

There were ten present at the January meeting of the Aims Community club. It was decided to again buy material for work for the Veteran's hospital Christmas gifts. Pot-luck suppers were decided upon instead of birthday parties every three months. Co-hostesses were Mrs. Allen Baker and Mrs. Frank Dunlop.

Adult Bible study at Elmer Goertz's home was held Tuesday evening. Thursday classes will be at Mrs. Ralph Bowman's. Children's Bible club and Young Life as usual.

The PTA had a nice meeting and the pictures shown by the health nurse were interesting. Hostesses served a nice lunch. Next month is Founder's month and the meeting will be planned on that theme. Everyone is invited.

American Legion and Auxillary of Corbett will meet this Friday evening, weather permitting, at the Legion hall.

Former Sandyite Passes At Agate Beach; Rites Conducted in Gresham

Funeral services were held Tuesday, Jan. 11, in the Chapel of Carroll Funeral Home in Gresham for Mrs. Lida Olive Soderlund of Agate Beach, formerly of Sandy, who died Jan. 5 enroute to a Newport hospital following a heart attack.

As a young girl, she moved to Michigan until 1910 and to Washington in 1915 then to Tillamook county in Oregon until 1942 when she moved to Gresham. In 1943 she and Mr. Soderlund came to Sandy where they resided until his death in 1953, when she moved to Agate Beach. In February, 1941, she was married to Simon Eric Soderlund. She was a member of the Re-organized Church of Latter Day Saints of Portland.

She is survived by three children: Mrs. A. H. (Mary) Bessant of Sandy; Eugene H. Ladue of Agate Beach, and Richard Ladue of Salem. There are two grandchildren. There are also six sisters and two brothers surviving: Mrs. Chris Shultz of Hope, Ida.; Mrs. Charles Buckbee of Agate Beach; Mrs. Carl Becker of Newport; Mrs. Andrea Ezatoph of Boise, Ida.; Mrs. Roberta Roberts of Seattle, Wash.; Mrs. E. T. Steinbacker of Helena, Mont.; Rev. Vincent Schultz of Tigard, and Irvin Shultz of Newport.

Rev. Roy Graham of the Sandy Baptist Chapel conducted the services. Burton Blake was soloist and Mrs. A. K. Bishop was accompanist. Interment was in Forest Lawn cemetery, Gresham.

Pallbearers were A. C. Leathers, Kenneth Gable, C. S. Lindsey, Charles Lindsey and Roy Workinger, Jr.

Plans For Lamp-Type Pig Brooder Available

Providing a corner heat lamp for baby pigs is not enough during the first hours after birth, says Hugh Caton, county extension agent.

A securely fastened 250-watt infra-red heat lamp, hung about three feet above the farrowing pen will warm the average size litter. After the first twelve hours, the heat should be placed in a protected corner where the pigs can be warmed with less danger of being lain on by the sow.

Plans for an electric lamp-type pig brooder are available at the county agents' office in Oregon City.

now for Olympia!
