From where I sit... by Joe Marsh

Red Finds a "Sweet Solution"

Red Jackson found a slick way to get his cows to eat what's good for them. Seems they were passing up the tall green grass—and eating the short grass, which is naturally sweeter.

Red solved the problem by spraying a solution of corn syrup over the grass that was going begging. The cows sure went at it. Red says it's lucky for him—and the cows—that every one of them has a "sweet tooth."

Next week, according to Red, he's going to have his cows clean

up all the weedy grass along his fences—after he sprays them with more corn syrup, of course.

From where I sit, some folks, like Red, are always trying out new tricks—and others stick with the old tried and true methods. Just a question of preference, I guess. Like the way you may enjoy coffee with meals, while I prefer a cold glass of beer. So let's not allow any bad feelings to "crop up" by thinking ours is the only choice.
