Jet Racers Being Rushed

SANDY—The most talked-about sporting event on the lips of Sandy grade school youngsters this week is the annual miniature hot-rod race expected to take place October 31 and November 1 and 4.

Enthusiasts who are expected to enter the competition this year are rushing to complete their miniature jet racers in time for the two elimination races.

The jets are constructed by the youngsters on an individual basis, using carbon-dioxide tubes purchased from the school. Most of the builders are in the upper grades of the school. The first elimination races will be held October 31, the second November

1, and the third November 4 in the gymnasium of the school. Most of the racers are made at home.

Three prizes are given for best designs and workmanship and three prizes for the top three teams in speed runs.

OUR TOWN MAY NOT HAVE AN EARLY WARNING!

Lack of civilian volunteer plane spotters leaves vital observation posts vacant

How important are these plane spotter posts? Read these facts and judge for yourself:

The Reds have recently completed several air bases in northern Russia from which they can reach any point in the United States. The Soviets are known to have 1000 heavy bombers—enough to blast 89 top U. S. cities at a single blow leaving eleven million casualties!

"What about the Air Force and Radar?" you ask.

Our interceptor planes and anti-aircraft batteries . . . must have an early warning. Our present radar can

not be depended upon because of its inability to spot low-flying aircraft. Only the eyes and ears of the Ground Observer Corps can do this job. And, the shocking fact is that our town simply does not have enough volunteers to man all of the necessary spotter posts!

Will you help fill the gaps in our ranks? Join the 300,000 Americans wearing the G.O.C. wings. So long as the Iron Curtain still exists, we dare not relax our "Sky Watch." Two hours a week is all that is required to help keep your home and your country safe!
