Letters To The Editor

Editor, Sandy Post

Among the articles found strewn in the front yard each morning are: candy and gum wrappers, cigarette packages, match folders, kleenex, paper cups, drinking straws, envelopes, beer bottles, even green stamps (of a kind I'm not saving, naturally).

I wonder if there were some litter cans installed around town, if people would use them or perhaps folks could be encouraged to attach a litter bag somewhere to their person or maybe someone else might have a suggestion as to how our streets, sidewalks and front yards could be protected against "litter bugs".

It would make the town look neater. Have you an idea?

Sincerely,
Mrs. Wesley Kent

Editor, Sandy Post

Thank you very much for the excellent coverage your newspaper gave the Mental Health Association Christmas gift project for the patients in the state mental hospitals. Without the support of the newspapers the gift project could not possibly be successful.

Sincerely yours,
Mrs. J. Robert Ridehalgh
Christmas gift chairman

WORTH MORE BECAUSE THEY WORK MORE

Chevy's new torsion springs and Sturdi-Bilt design are changing everybody's ideas about how much work a truck can do. Last year's schedules are out—Chevrolet trucks ride faster over the rough than to get in more trips a day! Big repair bills are no longer a problem—Chevrolet trucks soak up punishment that means downtime to other makes! And trade-in time's put off for extra thousands of miles—'60 Chevrolet trucks stay new like never before!

New Dollar-Saving Prices Step-Vans, 4-Wheel Drives, many light-duty models with automatic transmissions—all are lower priced. Prices have also been reduced on all optional V8's.

New Torsion-Spring Suspension Eliminates I-beam shimmy and wheel fight! With torsion spring up front there's a brand-new, smoother, easier handling feel behind the wheel. New rear suspensions include wide-based coil springs in most light-duty models; tougher variable-rate leaf springs in medium- and heavy-duty models.

Electrically Balanced Wheels Front-wheels and tires are balanced at the factory. Helps make that new ride revolutionary!

New Cabs—Wider, Safer, More Comfortable Many models are a whole 7 inches lower (without sacrificing road clearance), so it's easier to hop in and out of cabs. Still there's more space inside; more room for hats and hips, more foot room with suspended pedals. Cabs are safer, too; new build makes them 67% more rigid.

Plus Improvements All Through the Line A new steering linkage system that cuts vibration, means better control. There's new V8 efficiency. Sixes long famous for saving. New key-turn starting. Higher, wider visibility. Talk to your Chevrolet dealer about the world's most advanced trucks.
