Farm Bureau Furrow

BY SCOTT LAMB

One of the problems with the "poverty" bill being hashed through Congress is the implication that everyone should have a better job. Such a philosophy leaves a hole in the process of growing up.

People don't just become butchers, bakers or candlestick makers—they somehow learn their trade. To expect anyone to be a master craftsman simply because he has a hammer and saw and learned how to read a blueprint in school is an oversimplification of the trade.

There are many opportunities in agriculture for young people to become high paid specialists. Many balk at the idea of working on the farm at low wages to learn about agriculture, but it is a necessary part of the program. By being observant and inquisitive, such a person can gain great knowledge which will serve him well in whatever branch of agriculture he may wish to enter.

There is a belief that seems to persist and grow -- that the nation's industries owe people a job. This is not true. Progress comes from people making jobs for themselves. Part of this process is being prepared for a job and it is a privilege to be able to work in an occupation to gain experience.

The person who says, "I can't find a job which requires no effort or experience on my part." The jobs are available. In fact they are going begging. Nowhere is there more opportunity than in this great nation. It does require effort on the part of the individual and the "poverty" bill or a hundred "poverty" bills will not cure lack of initiative.

Agriculture needs many qualified people for hundreds of branches of endeavor. To be sure, automation cuts down on the number of field hands, but it increases the overall number required to build, maintain and operate the machines. It also expands the need for better marketing, crop control, transportation and a host of other demanded improvements.

If we need a new bill aimed at helping the poor, it should be one demanding they be more ambitious and try to help themselves. It wouldn't work, either, but it would be as effective as a "poverty" bill.
