

"Making the Sandy Scene"

Kathleen O'Brien MU 7-4063

Even the truth is hard for some people to believe! Take, for example, a recent incident when one of our local citizens was asked: "What is your name?" He replied, but wasn't too surprised when the question was immediately repeated. Seems he has often heard the remark: "Let's not have any kidding now, what is your name?" He spoke the truth -- the Wild West can't claim the only Jesse James--we've had one in Sandy for nearly 25 years!!

Richard Harland Northrup, July 17th showing the Principality of Liechtenstein, and this Teague, of Riffe, Wash., were

married July 19 in a double-ring ceremony performed by Judge George Howeller.

James Durr, 17, is taking classes at Oregon Technical School in Portland. He hopes to continue his education at O.T.I. at Klamath Falls, and eventually get a degree in engineering.

Received a post card dated July 17th showing the Principality of Liechtenstein, and this note from Helen and Pete Sulz-

bach: "Just near Zurich - The Alps are beautiful. We spent the day in a small alpine village with friends. We've enjoyed our week spent in Italy and this past week in Austria and Germany -- and now in Switzerland. The cathedrals are awe-inspiring - beautiful. The drivers are wild - no speed limit signs! We loved Venice and the canal boats-- and St. Marks Square. We'll go back into Germany next week -- On to Paris!!"

John and Bunny Bye celebrated their 5th wedding anniversary yesterday. Rich and Maybelle Wesselink also had a wedding anniversary July 27.

Happy Birthday today to Bina Perrett, Mabel Beers, and Hugh Johnson!

bershop music is also promised. The place? Sandy Pioneer Park, west of Sandy. It's a day for recalling Sandy's past...

Katherine Erickson, Loris Townsend and Bill Stauffer all had birthdays yesterday.

While on the subject of American Field Service I found it interesting to note that our own Chon Saekoh wasn't the only AFS student having the problem of gaining weight during her stay in the U.S. For those who may have missed the article in

the Oregonian recently, here's a few excerpts: The 3,086 students returning home to 59 countries following their year in the U.S. were taking home an additional over-all total of 16 tons! Nearly every student had gained from 2 or 3 to 30 or 40 pounds. An Italian student gained 25 pounds on "malts, ice-cream, pastries and pies". A girl from Finland blames "fried chicken and ice cream". A Paris student had this remark: "It's not surprising. Americans take cars everywhere they go. When I went to the mailbox, I took a car." A Tokyo student, who had gained 25 lbs., had his solutions to

Train movements on Union Pacific Railroad are speeded on their way over more than 2,100 miles of the road's trackage by the seemingly magical assistance of centralized traffic control (CTC), enabling a single track to carry 80 percent of the capacity of double track.

By pushing the proper buttons or levers on the CTC control panel, a dispatcher can change signals and open or close switches over many miles of track, enabling freight and passenger trains to pass with planned precision keeping their pace smoothly through to destination.

Another smooth operation at Union Pacific is our efficient Industrial Development Department that is prepared to research markets, analyze traffic--to locate, plan, even develop plant sites. If we can help, let us hear from you.
