## Spray Berries Now Says Agent

Copper sprays should now be applied to trailing caneberrys for control of leaf and cane spot fungus, recommends Sam Meyle, county extension agent.

Trailing caneberrys such as loganberries, youngberry, boysenberry, and cultivated selections of trailing blackberry are susceptible to the leaf and cane spot fungus. Old fruiting canes should be removed before spraying with Bordeaux 8-8-100 or tribasic copper sulfate.

The first symptoms of leaf and cane spot generally show up as purplish spots on the leaves, with lighter colored centers developing during the summer months. These later spread to other leaves and the canes during early fall and winter.

Complete spray coverage of all canes is necessary for control. Spray before the fall rains start and add a spreader-sticker to make this protection last throughout the winter.

## SALLY'S ALLEY News from Eagle Creek

By SALLY SEYMOUR 279-6368

Monday, a group of concerned mothers from the Eagle Creek Mother's club, met with Mr. Frink, principal of Estacada grade school. The purpose of the meeting was to find out more about the proposed bond issue on the grounds that Eagle Creek's needs have been completely overlooked. Some of the important points gleaned from this discussion were:

1. It was admitted that the University of Oregon survey showed a rapid population increase in Eagle Creek and an urgent need for a new grade school.
2. Eagle Creek has at least ten acres for a new school site, bought and paid for.
3. Eagle Creek residents were not fully informed of the tremendous advantages of the pod-type building, nor was a more conventional type building proposed for their approval.
4. This proposed school will cost one dollar per square foot more than the type of school originally planned for Eagle Creek. It is a stop-gap measure and another bond issue would have to be voted on in a few years for more classroom space.
5. The original bond issue would have given us a new school in Springwater, and Eagle Creek, and bought the old high school for Estacada's future needs, solving the prob-

lems of classroom space for a good long time, instead we are offered this plan for only \$200,000.00 less with future needs not solved at all.

If you are at all interested in the school bond issue, attend the open school board meeting Sept. 27 at 8 p.m., at the elementary cafeteria in Estacada. Don't forget we must have a new school and as long as we have to pay for it anyway, I'm all for having one in Eagle Creek.
