

VICINITY MAP — ROADLESS AREAS
MT. HOOD NATIONAL FOREST

ROADLESS AREAS

- 081 Eagle Lake
- 082 Big Bend
- 083 Mt. Hood Additions
- 084 Wind Creek
- 085 Salmon River
- 086 Twin Lakes
- 087 Badger Creek
- 088 Bull-of-the-Woods (includes some on Willamette N.F.)
- 089 Olallie Lakes
- 090

Roadless area workshops planned

During the month of August the Forest Service's Mt. Hood office will hold a workshop aimed at updating and refining its inventory of areas in conjunction with President Carter's commitment to move ahead in identifying areas to be added to the Wilderness System.

The three main objectives of the workshop will be to explain the purpose of the Roadless Area Review and Evaluation (RARE) process originally

begun in 1972, hear public suggestions on additions and deletions to the roadless area inventory and have the public provide a list of items to be considered in developing criteria for wilderness areas.

Information gathered at the workshop will be used to improve coordination of the Forest Service's land use planning positions on wilderness proposals as they come before Congress.

The workshop for the Port-

land area (including the Mt. Hood National Forest) will be Saturday, Aug. 13, from 10 a.m. to 2 p.m. in the Smith Memorial Center at Portland State University.

Those interested in only the Mt. Hood Forest can stop by the Mt. Hood Supervisor's office Monday through Friday, Aug. 1-5 from 7:30 a.m. to 7:30 p.m., except for Tuesday from 9 to 10 a.m. The Mt. Hood Supervisor's Office is on 2440 SE 196th.

Display maps and

photographs of representative areas will be available at the office, along with a list of definitions used in identifying roadless areas, a booklet on roadless areas and a national list of criteria used in wilderness evaluation.

Suggestions and input can be made at the workshops or by mail before Sept. 15.

For more information or to have an information packet mailed to you call 667-0511, ext. 259.

Football program stays at Clackamas CC

For now, Mt. Hood Community College and the other members of the grid establishment in the Northwest Athletic Association of Community Colleges (NWAACC) will number nine teams this fall.

The football program at Clackamas CC won a reprieve Wednesday night as the college's board voted 5-2 to establish a blue ribbon citizen's committee to study the Clackamas athletic program.

The recommendation before the board from college president Dr. John Hakanson was to eliminate the grid program following the 1977 season. The approved board action and the recommendation would have allowed football at Clackamas this season and may save it in the future after six years of existence.

The blue ribbon committee will reportedly be formed within two months and it would

be around six months before initial reports would come from the committee.

In the past year, Mt. Hood CC had a blue ribbon citizen's committee observing its co-curricular athletics and activities.

Clackamas CC athletic director Chuck Hudson was pleased by the results.

"I was very pleasantly surprised and I see it as a victory for football," Hudson

said. "We're going to keep football, I'm sure of it now. When the people become more aware of the facts, then I believe we might even get a larger budget to work with."

In the 1976 season, the Clackamas CC budget for football was \$29,676.

Field day

The City of Sandy's first annual summer field day is set for Friday, July 22, at the Sandy Elementary School track.

Events will begin at 10 a.m. with registration held prior to that time.

Ribbons will be awarded in the following events; boys and girls softball throw, long jump, distance races, obstacle course, single and double partners sack race.

The final event of the day will be a tug of war between competing age groups.

For more information call Tom Botbyl at the Sandy Recreation Department at 668-5569.

Golf scores

Mt. Hood Golf Club Ladies' Day — July 7

Low Gross
Class A — Janelle Williams — 88
Class B — Lorrie Lythgoe — 86
Class C — Susan Wolf — 105

Putts
First — Lorrie Lythgoe — 13
Second — Bonnie Evans — 14; Dolly Fouch — 14

July 14
4 Ball Best Ball
First Dottie Bruns — 47; Marilyn Hansen — 47; Lorri Lythgoe — 47 and Nonie Smith — 47.
Second — Margeli Baessler — 51; Betty Tauscher — 51; Clara Turin — 51 and Susan Wolf — 51.

Low Gross
Class A — Marylee Rupp — 83
Class B — Lorri Lythgoe — 91
Class C — Clara Turin — 102.

Putts
Marylee Rupp — 12
Lorrie Lythgoe — 13
Dolly Fouch — 14.

Fishing suggestions needed

With the fishing season in full swing, the chances are you've been out several times at least. It may be you've run up against angling regulations you don't agree with, or perhaps you have suggestions for rules or seasons you think would help improve angling in Oregon.

If so, now is the time to do something about it. Fishery Division staff biologists with the Department of Fish and Wildlife are meeting this month with field biologists stationed throughout the state to review the current regulations, the status of fish runs and habitat, and changes in angling pressure and preference.

These meetings will provide the raw material for recommendations the staff will make

to the Fish and Wildlife Commission this fall for sport fishing regulations in 1978.

On Sept. 24 the staff will present its recommendations to the Commission at a public meeting in Portland. Those proposals, as well as recommendations from the public, will then be publicized so all anglers will have an opportunity to review them. On Oct. 22 a public hearing will be conducted and final regulations adopted.

The public will have an opportunity to present comments and recommendations at both these meetings. But if you have a complaint with any of the current rules or a recommendation for a new rule, the Department urges that you

write your thoughts in a letter now and submit it so it can be evaluated and considered now, rather than during the last minute rush to adopt 1978 rules this fall.

Comments from organized sportsmen's groups as well as from individuals are being sought. Each year the Department and Commission receive many letters from citizens or groups but many of them come in at the last minute when the staff is not able to give them the thorough attention they deserve.

Letters can be sent to any of the Department's regional offices or to the Fish and Wildlife Department, Attention Fish Division, P.O. Box 3503, Portland, Oregon 97208.

Clackamas raft race July 30

If padding your own canoe is your bag, or even a secret desire, head for the Clackamas River on Saturday, July 30.

That's the day of the second annual Clackamas River raft race sponsored by the Gladstone Jaycees and Blitz-Weinhard Brewing Company. And that's the day they'll give away a classic 16-foot Klickitat canoe. Other prizes will be handed out in five racing categories of floatables.

The Portland-built canoe,

valued at over \$500, will be given away to one of the entrants in the seven-mile race, not by the speed of the paddle, but by the luck of the draw.

Entries will be accepted at the start of the seven mile downriver run at Carver boat ramp just off Highway 224 southeast of Portland. Finish is scheduled for Meldrum Bar Park at Gladstone where the Clackamas meets the Willamette River.

Races will be for canoes,

kayaks, and one-person, two-person, and three-person or more divisions, with prizes including picnic coolers, backpacks and sports shirts.

More than 300 entered the race last year on some 135 crafts. Sponsors expect many more to make the jaunt this year. As in 1976 all entrants will be required to wear life jackets. Experienced boaters will patrol the course for added safety.

There is a small entry fee per person.

Garden oddities featured at fair

If your garden develops a sense of humor this summer and produces a vegetable that simulates a distorted caricature of Aunt Minnie or suggests a visitor from outer space, don't just chuckle to yourself or panic.

Exhibit the oddity at the Clackamas County Fair and it may win you a prize.

The idea for the "garden oddities" feature at the Clackamas County Fair was born in all probability when two or more loud-mouths at the country store challenged each other's claim to be the largest watermelon in the county, said E.A. Shibley, Estacada, superintendent of the fair's Agricultural Crops Department.

Listeners probably suggested the solution, Shibley said. "Come to the county fair, the contenders were told, "and put your melons where your mouths are."

At any rate, the "garden oddities" exhibit has proved itself one of the most popular features at the annual Clackamas County Fair,

scheduled this year Tuesday through Saturday, Aug. 16-20.

Competition is open to all who claim to have grown the largest watermelon, the largest squash or stalk, the largest squash or pumpkin, the largest cabbage, the most freakish vegetable or the tallest stalk of corn.

As in past years, one of the highlights of this season's agricultural products competition will be the designation of a "Champion Gardener." The winner will be selected from the exhibitor scoring the most points in the various categories of the division — grain and seed, vegetables, fruit, berries, nuts and honey. Prizes will be awarded.

A special award will be given to the exhibitor with most points in any four lots of the shelled grains and seeds class.

In addition to the special awards announced, regular fair premiums will be paid in all categories, Shibley noted.

Entries are limited to Oregon grown products and must be grown by the exhibitor. Entries will close at 8 p.m. Monday, Aug. 15, the day before the fair.

Permits required

Permits will be required in 12 of 16 wildernesses in the national forests of Oregon and Washington this summer, according to the U.S. Forest Service.

Permits will be required for all visits to Diamond Peak, Eagle Cap, Mountain Lakes, Mt. Hood, Mt. Jefferson, Mt. Washington, Strawberry Mountain and Three Sisters Wildernesses in Oregon and for overnight trips only to the Glacier Peak, Goat Rocks, Mt.

Adams and Pasayten Wildernesses in Washington. No permit is required for the new Alpine Lakes Wilderness in Washington, the Gearhart Mountain and Kalmiopsis Wildernesses in Oregon and the new Hells Canyon Wilderness bordering the Snake River.

The permit system will be in effect from June 15 to Nov. 13 except for the Glacier Peak and Eagle Cap Wildernesses where it is in effect all year.

Handicapped get info

A meeting to inform handicapped persons, and any other interested people, about the Handicapped Resource Center is set for July 27, at Clackamas Community College at 10 a.m.

The session will be held in the Community Center building, Room 101.

The resource center, now being developed to serve

handicapped people in Clackamas County, is located at Clackamas Community College.

The goals of the center include employment, education, support services and referrals for the handicapped.

For additional information, phone Ron Kunkel, Clackamas Community College, 656-2631, ext. 324.

Fish & Wildlife News

Barbless hooks can do the job

Mashing the barb on a good fish hook to make it barbless is like releasing a good fish — it's not easy to make yourself do the first few times.

But there are good arguments for using barbless hooks, just as there are for releasing those fish you don't plan to eat but want to fight again another day.

I began using flies with the barb pinched down on Hosmer

without removing it from the water or handling it at all. You simply grasp the hook shank and tweak it free.

Even if you're keeping fish, there's at least one good reason to use a barbless hook. "I soon found my flies, especially the dainty dry flies, last longer when tied on a barbless hook. I don't have to mangle them to unhook a fish."

A pair of needle-nosed pliers (or a hemostat like surgeons use) helps make short work of removing even deeply taken hooks, barbed or not.

In most of these comments I'm referring to fly fishing. Bass plugs, metal spoons and other heavy lures pose a problem for barbless hook users because the sheer weight of the lure will often break a hook out when a fish jumps or shakes its head. Although this can be minimized to some extent by keeping the line taut as much as possible, it will still be a problem for anglers using heavy lures.

But for bait fishermen, the barbless hook can have some real benefits.

If you've ever fished with worms for panfish like bluegills or catfish, then you know the frustration of a deeply swallowed hook that won't come out without killing the fish. In hot weather a dead fish often means a spoiled fish.

But you'll find that needle-nosed pliers and a barbless hook will let you get those worm hooks out easily most of the time with far less damage to the fish.

But the final argument concerns personal comfort, a subject dear to the hearts of all.

If you're a fly fisherman, sooner or later you're going to hook yourself and when you do, that hook will feel much better coming out if it doesn't have a barb.

by Ken Durbin

Lake in Central Oregon where regulations require it. The barbless fly rule was established there years ago to minimize injury to the Atlantic salmon which provide an exciting hook and release fishery.

Much to my surprise, the lack of a barb lost me very few fish. Since then I have used barbless hooks for many kinds of fishing, finding the benefits far outweighing any small increase in numbers of fish lost.

As far as I can tell, there have been few if any large-scale studies on the mortality of fish hooked on barbed versus barbless hooks. But common sense suggests a hook without a barb must cause less damage in removal than one with, especially in the larger hook sizes often used in western fishing.

If you release fish on the premise that they might be there to tempt you another time, then it makes good sense to use barbless hooks even if a few fish turn you loose before you're ready.

Barbless hooks will often permit you to release a fish

Fire damages car

A garage and the vehicle inside were both damaged in a fire last week at the intersection of Cherryville and Batty roads.

The vehicle was pulled out of

the garage before the Sandy Fire Department arrived, but not before the gas line had caught on fire, destroying the front end of the vehicle. The garage sustained minor damage.

1977-78 Hoodland Rural Fire District No. 74 Budget

NOTICE OF BUDGET HEARING

The budget for HOODLAND RURAL FIRE DISTRICT No. 74 for the fiscal year 1977-1978 beginning July 1, 1977 as detailed and summarized below, was prepared by the Cash, Accrual, Modified Accrual accounting basis, and is, is not consistent with the accounting basis used during the last two years. Major changes, if any, and their effects on this budget are set forth in an accompanying statement. A copy of the budget document may be inspected or obtained between the hours of 9:00 A.M. and 5:00 P.M. at HOODLAND LUMBER & HARDWARE; Wemme, OR. A meeting of the BOARD OF DIRECTORS (Governing Body) will be held August 8, 1977 at 8:00 a.m. p.m. at ZIG ZAG FIRE STATEION for the purpose of holding a public hearing on this budget. Any person may appear to discuss the budget, or any part of it.
