

A breakthrough in Radio Control...

THE 18-WHEELER

You can hitch and unhitch tractor and trailer by radio control. Steering wheel on transmitter provides proportional steering. Drives forward and reverse. Pro-Cision brake-stop action. Trailer body can be removed to reveal flat-bed with loading ramp.

Wind these little rascals up and let 'em wander, they look like they came from way out yonder. They toddle along with a great walking action. They look like they came from outer space. For young astronauts ages 3 and up. Stock No.: 2517
