## PUBLIC NOTICE OF FILING OF REVISED OREGON ELECTRIC RATE INCREASE APPLICATION

On April 7, 1981, Portland General Electric Company filed revised rate tariffs with the Public Utility Commissioner of Oregon to become effective on May 7, 1981. The proposed increase is approximately 10.9 percent for residential customers and from 8.4 percent to 13.1 percent for commercial and industrial customers. This would increase rates for residential customers, with monthly use of 500 kilowatt-hours, by \$2.12 per month in the summer and \$2.42 in the winter. For customers using 1,000 Kwh a month, the proposed increase would add \$4.24 to the monthly bill in the summer and \$4.83 in the winter.

The total proposal would increase annual revenues by \$54.9 million during the 12-month proposed test period, January 1, 1981 through December 31, 1981 or an overall average of 10.8 percent.

### Reasons for having to request this increase in electric rates.

The Company, like everyone else, is faced with ever-rising costs during this inflationary period. The materials, equipment and supplies necessary to provide electric service to increasing numbers of customers continue to be more expensive. The costs of expanding and maintaining a dependable transmission and distribution system, of owning and operating needed thermal generating facilities and of conforming to ever-increasing regulatory and environmental requirements—all have increased.

### Other Information

The purpose of this notice is to provide customers of the Company with general information as to the proposals made by the Company and their effect on customers. The calculations and statements contained in this notice will not be binding on the Public Utility Commissioner of Oregon, John Lobdell.

The Public Utility Commissioner has scheduled a pre-hearing conference at 11 a.m., Thursday, May 14, in Room D, Labor and Industries Bldg., Salem, Oregon, to identify issues and interested individuals, groups and organizations for possible future hearings.

If you wish to receive additional information or notice of the time of any additional public hearings, if scheduled, a special toll-free number 1-800-452-7813 has been established by the PUC of Oregon. Ask for the Consumer Assistance Division of the Office of the Public Utility Commissioner. Also, you may write to the Public Utility Commissioner of Oregon, 300 Labor & Industries Bldg., Salem, Oregon 97310.

Copies of the Company's proposed rates and exhibits are available for inspection at the following PGE division offices:
