If you earn between \$20,000 and \$75,000, this ad should be required reading.

You earn an excellent salary. And yet, like so many other successful Americans, maybe you've found making ends meet and saving money an uphill battle. Even if you are saving and investing, inflation and taxes are working against you. You worked hard and should enjoy the fruits of your labor.

An Education Gap

Chances are you've spent from 12 to 16 years in school learning how to make money, but you never really learned to manage the money you make. An oversight to be sure. Some call it a failure of our educational system.

The good news is you can compensate for this education gap by attending a Successful Money Management Seminar in your area. You'll learn the fundamentals of personal money management. You'll learn that people don't get rich by making money, but by managing the money they make.

The Seminar is inexpensive, easy to understand, and vital to your future financial well-being. The Seminar will teach a proven money management technique. It's a simple process called repositioning. An effective tool, but largely unused by the majority of Americans.

Repositioning Assets

You can take charge of your financial future when you save and invest through deliberate repositioning and planning. Repositioning starts with how you spend your money.

For instance, you likely spend what you can to maintain your standard of living. Things like mortgage payments or rent, food, clothing, transportation and entertainment. Then you pay the cost of insurance and send a large portion of your income to Washington, D.C. as taxes. Finally, after all this, there is something left over for savings and investment.

The goal of repositioning is to maintain your standard of living, save on insurance costs and lower your taxes, leaving a larger percentage of your earnings to save and invest. The Seminar will then teach you how to plan and invest wisely.

Personalized Plan

Every couple or individual who attends will receive a personalized plan. You'll learn there is a big difference between simply making a couple of good investments and strategically investing according to your income, debts, goals, family needs, retirement objectives, and more.

You, our financial planners, and our computers all team up to create a workable financial blue print for our future. Specifically the 10 1/2 hours of instruction and the plan will help you. . .

- Analyze whether or not your assets are properly positioned.
- Learn to make maximum use of your pretax and after-tax earnings.
- Determine the amount of capital you'll need to achieve your goals and ensure a secure financial future.
- Learn about the various kinds of savings and investments you'll need.
- Learn how to use tax-advantaged investments.
- Learn how to invest to take advantage of inflation.
- Learn how to take advantage of the tax laws in the long-run and make use of Reagan's tax bill now.
- Determine the amount of money your family will need in the event of your premature death, and project how long they'll need it.
- Learn the importance of proper estate planning.

Materials and Instruction

You receive a workbook that includes all materials, a personalized financial plan and 10 1/2 hours of professional instruction spread over three, 3 1/2-hour evening sessions. The total cost is only \$35 per individual or couple, payable in cash or by check, VISA or MasterCard at the door of the first session. Only one set of materials is required per individual or couple.

Seminar Agenda

1ST SESSION: MONEY DYNAMICS
The Money Game, Financial Goal Setting, Repositioning Your Assets to Your Advantage, Five Reasons People Fail, Making Inflation Work for You, You Can Become Financially Independent, Uncovering Your Hidden Assets, Your Own Personalized Financial Planning Program.

2ND SESSION: WORKING DOLLARS
