## PUBLIC NOTICE OF FILING OF GENERAL TELEPHONE RATE CHANGE APPLICATION

On March 8, 1985, General Telephone Company of the Northwest Inc. filed with the Public Utility Commissioner of Oregon revised rate schedules to establish new rates for its Oregon customers. If approved as submitted, the new rates requested would represent an increase of \$7,439,192 in annual local revenue or an increase of 10.1 percent. The average residential customer's monthly bill for network access would increase a total of 91 cents per month.

### Why Are We Proposing New Rates?

We are seeking revised rates for the following reasons. First, we need to recover an annual revenue loss caused by the discontinuance of the surcharge on in-state long distance calls. Second, we need to meet revenue requirements associated with increased investment activities. Those activities are not being fully offset by revenue growth. At the same time, we seek to maintain a reasonable earnings level.

- This annual revenue would be obtained by:
  - An addition to the network access rates. Single-line residential access rates would increase a total of 91 cents per month, single-line business access rates would increase \$2.03 per month, trunks would increase \$3.14 per month and semi-public access rates would increase \$2.26 per month.
  - A restructuring of installation charges, which includes increases and decreases making them relate to the work actually performed.
  - An increase in the charge for directory assistance from 20 cents to 50 cents per call and a decrease in the free call allowance from five to two.
  - An increase in the leased rates for company-provided standard single-line telephone instruments from \$1 to \$1.85.
  - An increase in the premium rates for Touch Call telephones leased from the company from 50 cents to 65 cents.

As part of the filing, the company is asking for interim rates effective on April 8, 1985, to recover \$1,950,972 in annual revenue lost through discontinuance of a three-cent per minute surcharge on in-state long-distance calls handled by local exchange companies, such as General Telephone. The surcharge was discontinued December 31, 1984.

### Other Information

Copies of the company's testimonies, exhibits and proposed rate schedules are available for inspection at the offices listed below where a representative of the company will answer any questions that you may have. Please feel free to contact one of these locations at the address or telephone number indicated. Copies of the company's testimonies, exhibits and proposed rate schedules are also available for inspection at our main office at 17855 NW Cornell Road, Beaverton, Oregon 97006.

Also, you may write to the Public Utility Commissioner of Oregon at 300 Labor & Industries Building, Salem, Oregon 97310, or you may call a special toll-free number at 1-800-522-2404. When your call is answered, ask to speak to the Consumer Assistance Division of the Office of the Public Utility Commissioner.

While the purpose of this notice is to provide you with general information as to General Telephone's proposed rate change, you should be aware that the proposal, calculations and statements contained in this notice are not binding on the Public Utility Commissioner of Oregon, and he may issue an order affecting rates different from those proposed by the company.
