

Summer movies combine fantasy and action with fun

RETURN TO OZ

"Don't take your baby brother to *Return to Oz*," warned Jennifer Ferguson, 10. "There are some really scary parts," agreed her friend Erika Nielson, 10. Dorothy, her talking chicken Billina and Tik Tok the robot have more than their share of trouble as they travel the yellow brick road. Oz has been taken over by a monstrous rock man, the Nome King, who appears out of the side of a mountain. For an additional dose of

evilness, the wicked Princess Mombi changes heads as easily and as often as most people change clothes. Based on two of the famous Oz books, *Return to Oz* is not a sequel to the other Oz movies but a fast moving fantasy that will spice up the end of your summer.

MAD MAX

The return of Mad Max in his third post-apocalyptic film may be the best yet. *Mad Max Beyond Thunderdome* pits

the good guys against the bad guys and introduces a tribe of wild children who think Max is the long awaited hero who will bring them to tomorrow-morrowland. Catch Mel Gibson's Max as he faces Tina Turner's Auntie Entity at Bartertown.

EXPLORERS

Have you ever made a fort or built a go-cart out of scraps of wood and rope and stuff? In *Explorers* Ben, Wolfgang

and Darren start their space-traveling vehicle in much the same way. The big difference is, that once completed, this thing takes them on a trip that is literally out of this world. Totally out of control, they are zoomed through space and into an alien space station. *Explorers* combines the magic of *The Neverending Story* with the computer effects of *Tron*. Catch this high flying adventure while you still have time to start your own construction.

APPLIANCE TIPS

Your Refrigerator

1. Help keep your refrigerator running "cool" by cleaning the coils at the bottom with a long handled brush once a month.
2. Close the door tightly after you get the ice you need for your kool-aid stand.

3. Check that the seal around the door is not cracked or broken.

All of these tips
will help your
family save energy
and costly repair
bills.
