Keep your range cooking

1. Never put aluminum foil under burners or bake elements.
2. Never use your oven to heat the house.
3. If your oven isn't working, check the timer to see if it's on manual.
4. Disconnect the range from the wall when checking electrical parts.

All of these tips will help your family save energy and costly repair bills.

Pacific Pete Says...

"Have a happy and safe holiday season."

Stores and shopping centers will be very crowded from now until Christmas. If you get separated from your parents when you are shopping, go straight to a salesperson and ask for help.
