ENERGY MANAGEMENT SPEAKER SERIES

"Sustainable Lighting and Daylighting Design"

James R. Benya, PE, FIES, IALD, LC

Tuesday, July 29, 7-9 pm

EWEB Headquarters, North Building Training Center

Internationally recognized lighting designer and sustainable design expert Jim Benya will present lighting design in the context of sustainable architecture. Beginning with a renaissance in the use of daylighting in buildings, he will also discuss the altered role of electric illumination, ultra-high efficiency electric lighting systems, and the difficulties encountered in creating attractive lighting designs without the use of incandescent lamps.

"Extreme Weather, Corrupt Politics: Finding a Future"

Paul Hawkins

Wednesday, July 30, 7-9 pm

U of O, Erb Memorial Union Ballroom

In this time of growing climatic and political instability, the term "sustainability" needs to be truly understood in order to move beyond lip service. Our security and survival depend on an array of critical choices that will require clear decisions in the near future. These choices cannot be made in the absence of biological knowledge or political integrity.

"The Truth About Comfort"

Reid Hart, PE

Monday, August 4, 7-9 pm

EWEB Headquarters, North Building Training Center

EWEB's lead engineer for energy conservation in commercial buildings discusses human comfort in relation to building heating and cooling systems. Energy efficient solutions to comfort are provided with time to answer your questions.

These educational seminars are presented free of charge by the Northwest Energy Education Institute (NEEI).

Pre-Registration is not required. For more information go to www.nweei.org

Sponsorship includes Eugene Water & Electric Board (EWEB) and Northwest Energy Efficiency Alliance (NEEA).

Paul Hawkins
