Greenhill
* Pet of the Week *

Everybody deserves a good home

Patootie is a gorgeous tiger with huge beautiful eyes. He is a calm loving cat who likes attention and will purr quietly. It may surprise you to learn that Patootie is nine years old, because he looks and acts like a youngster. Patootie is curious and likes to spend time looking out the windows at the cattery. Please don't overlook the love an adult cat can bring to your home. Patootie still has many years of love left to give so please come see him today! Greenhill tests all cats and kittens for feline leukemia, and Patootie has tested negative for feline leukemia and is cleared for adoption.

the morning-after pill
and the morning after that and the morning after that
and the morning after that and the morning after that

You have up to 5 days to take the morning-after pill.
But the sooner the better.

If you have unprotected sex for whatever reason - the condom breaks, you miss a couple of pills, you didn't use protection - or you were sexually assaulted, you can still reduce your chance of getting pregnant. Emergency contraception (EC), commonly referred to as the "morning-after pill", should be started within 5 days of unprotected sex. The sooner you take it, the more effective it is.
