the morning-after pill
and the morning after that and the morning after that
and the morning after that and the morning after that

You have up to 5 days to take the morning-after pill.
But the sooner the better.

If you have unprotected sex for whatever reason - the condom breaks, you miss a couple of pills, you didn't use protection - or you where sexually assaulted, you can still reduce your chance of getting pregnant. Emergency contraception (EC), commonly referred to as the "morning-after pill", should be started within 5 days of unprotected sex. The sooner you take it, the more effective it is.

* Pet of the Week *
Everybody deserves a good home

Hello, my name is Burley and I'm a very sweet and playful 6-month-old female cat. I am deaf, so I need a loving home where I will always be kept indoors. Before I came to Greenhill I was sick and covered in oil, but today I'm healthy and happy. All I need now is a new owner. Please come by Greenhill to meet me!
