the morning-after pill and the morning after that and the morning after that and the morning after that and the morning after that

You have up to 5 days to take the morning-after pill. But the sooner the better.

If you have unprotected sex for whatever reason - the condom breaks, you miss a couple of pills, you didn't use protection - or you were sexually assaulted, you can still reduce your chance of getting pregnant. Emergency contraception (EC), commonly referred to as the "morning-after pill", should be taken within 5 days of unprotected sex. The sooner you take it, the more effective it is.
