

Solar power. It works.

Solar water heaters work no matter what the weather.
Giving their owners reliable, earth-friendly power year-round. In fact, switching to solar can save you
up to 40 to 60 percent on your hot water costs (the second largest energy use in most homes).

And EWEB makes it affordable
with tax credits, cash discounts and 0% interest loans.

Call us at **484-1125** to find out how.

*Harness the power of the sun,
even when it's not there.*
