

*Honoring* our past,  
Creating our future

The Eugene Water & Electric Board is a leader in using clean energy, including wind and solar power. And for decades, EWEB has promoted energy conservation and helped customers improve the energy efficiency of their homes and businesses.

We do much more than provide water and electricity 24 hours a day, 365 days a year. For information about our many programs and services, visit [eweb.org](http://eweb.org).

*Rely on us.*
