HELLO! MY NAME IS

EMF Solutions for Safer Environments

*The Art and Science
of Living Wisely
with Technology*

We can help you to:

- Learn what is really going on with wireless technology and electro-pollution
- Become aware of high-risk exposure levels in your home and on your person
- Reduce radiation exposure levels up to 99%.

Why are many independently funded researchers, scientists and medical professionals saying that overexposure to electromagnetic radiation is the most important emerging health issue in the world today?

Soaring rates of cancer, autism, depression, dementia, Alzheimer's, sterility, insomnia and other health problems are strongly statistically correlated with the rapid rise in exposure to Electro-Magnetic Field (EMF) radiation. We are increasingly immersed in an invisible web of frequencies never before experienced in our development on Earth.

The radiant power output of some common household and wireless devices is tens of thousands of times greater than that of human brain activity, while the frequencies can be billions of times greater. A DECT cordless phone, for example, is 5.8 billion Hz, in contrast the brain's frequency range of 1 Hz to 38 Hz. These fields pass through walls, skin and skull virtually unimpeded and are absorbed by cells and DNA causing multiple disruptions, as evidenced in the comprehensive, in depth Biolnitiative Report [2012]. This report is based on the findings of more than 4000 independent worldwide studies.

Reviewing industry's past record of slow response and obfuscation in regards to public health concerns surrounding DDT, asbestos, tobacco, trans-fats, dioxin, and more, may offer insight into the effectiveness of the strategy of sowing doubt and controversy—until enough people wake up.

We are Yaqin and Abby Sliwinski, long time Lane County and Eugene residents. We have successfully helped to reduce exposure levels for family, friends and clients who simply wanted a safer, cleaner environment at home, as well as those experiencing various health challenges.

We use specialized analyzers to locate and measure radiation exposure levels. Our reduction strategies are science based, effective and affordable. Most of our solutions range from no to low cost with a special eye towards budget and personal preferences. Phone consultation and workshops also available.
