Your Child is More Than a Score

Opt-Out in 2016

- Smarter Balanced tests are not useful. The results come back after school is out, and students' specific answers are not even provided to the teacher.
- These tests consume unreasonable amounts of time and money: \$27.5 million in Oregon and 2-6 weeks of instruction time.
- These tests are really about ranking, not helping students. Studies show they aren't valid measures, and most colleges don't even accept them.
- These tests narrow and limit what our kids get to learn. They pressure teachers to teach to the test and to minimize subjects that are not tested.

Opt-Out.
