

Protect public health. Protect clean cannabis!

Oregon is bowing to Big Money at the cost of public safety!

The dirty secret in the cannabis industry is that pesticides are dangerously misused by some that put profits first. The State is proposing rules that will virtually eliminate pesticide testing for marijuana. These new rules assure that Oregon's marketplace will be contaminated with toxic marijuana.

WE NEED YOUR HELP NOW

Demand the State to require 100% quality control testing for pesticides and support HB 3448. Contact the decision makers by April 30th!
