E. M. Knox, County Agent
Curry County, Oregon

ECONOMIST FINDS SUB-TERRANEAN CLOVER BEST
 Harry Scoth, agronomist, U. S. Department of agriculture, was in Curry County two days last week to study the clover situation in the county. Mr. Scoth, study-planting nurseries and improved seedings. Subterranean clover was reported to be the outstanding variety with Highland Bent and Fescue providing the best permanency of all the varieties. Alta fescue is a long-lived grass but poor stands have been obtained. Mr. Scoth proposes one acre planting of each variety of grass so that the growers in this area will learn more about the stability, methods of establishing good stands, and balanced fertilization.

The Colegrove nursery which was established in 1939 on some poor land and on land which has been heavily grazed over since the war, and Highland Bent provide most palatable mixture and most persistent according to observations made by Mr. Scoth. Mr. Scoth recommended re-planting trials in the establishing of Lotus Uliginosus on wet lands. Several one to five-acre tracts have been established or are being established this year. He recommended a field day should be held so that growers in this area can study the results now available.

GRANGE SCHOLARSHIP DIVIDED BY GRANGE
 A meeting of Pomona Grange on Saturday the organization decided to sponsor two scholarships at the High Summer School, set for Clatskanie, June 18 to 28. Henry Adolphson is also providing funds and two delegates, the four known as the annual Pomona Grange-Adolphson scholarship which have been awarded many years to outstanding members.

WHEAT DOLLAR HIGHER THAN LAST YEAR
 Generally speaking, ranges and livestock in the western states were in fairly good condition on May 1, but not quite up to par, according to a live-stock review prepared by the extension service from USDA reports and other data. Conditions were favorable in all western states except Montana, where conditions were unfavorable in the southwest. The BAE reports that the early crop was in better than average condition on May 1 in all areas. From the standpoint of feed supplies, conditions in April were less favorable than a year earlier in California, Oregon, and Texas, but as good as in most other areas. Conditions were reported favorable in the northwest and a large proportion of the crop is expected to reach market by June, instead of going to market in July in competition with Curry County lambs as was the case during the last year or three years. Changes in the sheep division in the Portland were light, about one-half the number a year ago. By Wednesday, the supply had increased

to about the same as a year ago. The light supply Monday made for aggressive trading and steady prices which have since been good with spring lambs at \$14.75 to \$15.25. A few spring lambs in feeder flesh went at \$17. Spring lamb prices are about \$1.50 higher than a year ago and shorn lambs around a dollar higher.

V. F. W., Auxiliary Met Wednesday Evening

About 50 V. F. W. and Auxiliary members enjoyed a social evening at the I. O. O. F. hall Wednesday evening, followed by a lunch of sandwiches, salads and cake. Games, singing and dancing were on the program, with prizes being awarded for the winners in the contest.

Mrs. Lytle and Mrs. Alice Stokes were in charge of the program and all attending were appreciative of the efforts these ladies put into the affair.

Business meetings of the two groups take place on the first Wednesday of the month, and the third Wednesday evening is given over to social activities.
