Food Costs are UP, but...

Greyhound Fares are DOWN

40% Lower since 1933

Yes, in spite of higher living costs—and higher operating costs—Pacific Greyhound fares are lower than ever... **BECAUSE Greyhound service in Oregon is being steadily expanded!**

Riddle? No... it works this way—As Greyhound provides increased service for Oregon Communities, more and more people ride Greyhound buses.

Greyhound can carry 35 passengers for no more than it costs to carry 25. It costs little more to operate a depot for six buses a day than it does for four...and so on. If more people ride, Greyhound's costs go down. *And Pacific Greyhound passes this saving on to the people of Oregon...in the form of lower fares and better, more frequent service than ever.*
