

The Honeymoon Is Over

BUT Brookings-Harbor area will produce the world's finest Croft Easter lily bulbs. "It is a natural."

How many years will it take you to select and replant, and select and replant, and select and replant, in order to establish the quality you must have — and how many bulbs, that will measure up to a good standard, will you have left in your own field after these years of selection?

We have developed a very high standard of quality Croft planting stock. Our plants are all champions. They have established marvelous records for performance under the most difficult and rigorous tests that we, as plantsmen, could possibly give them.

Join those alert and progressive growers who have saved years of time by planting our stock; and who are in position to produce bulbs to the rigid and exacting standards now required.
