

Gardened Club Will Study Wild Flowers

July meeting of Azalea Garden club promises to be one of unusual interest. New officers to be installed are: Mrs. Wm. McVay, president; Mrs. W. H. Hibbard, vice-president; Mrs. Lillian Matthews, secretary. The new president will appoint her committees and outline the work of each.

Mrs. Hibbard, who recently returned from a meeting of Oregon Federation of Garden Club at Eugene, will continue her report of the work other garden clubs of the state are doing.

"Knowing Wild Flowers" will be the subject of the program for this meeting. Eight members will show and name a wild flower, describing its natural haunts. To display flowers will be Mrs. Ben Kerns, Mrs. John Rogers, Mrs. Walter Pearmine, Miss Rose Baumgartner, Mrs. Bob Perkins, Mrs. John Hogan, Mrs. Emma Neeves, Mrs. Jessie Judkins and Mrs. Ben McKernan.

Wild flower arrangements will be given by Mrs. Lloyd Moss, Mrs. Tony Olsen and Mrs. Vera Asche. Judges and constructive criticism will be given by Mrs. A. E. Stonehouse and Mrs. Almo Newton. Mrs. F. Palladay will give a talk which promises to be of much interest as the Palladays are well known as flower students.

Hostesses for the occasion are Mrs. Norma Holland, Mrs. Howard Haggerty and Mrs. Alice Rausch. Visitors are cordially invited to come.

R. M. Calhoun, who sold his holdings here this week, is leaving shortly for Myrtle Creek, to make his home, at least for a year, he told the Pilot.

Members of Coos Electric Co-op:

How far would a woman get toward finishing any sewing without a needle, a thimble, of the thread she needed? Not very far, perhaps!

The same situation exists with us: We have some poles, we have some transformers, we are quite shy on insulators, cross-arms, and the little braces used for their installation. Combining all these factors, shows why line-building has been so slow in the past several weeks.

However, in the past week, we have received a few items of those hard-to-get materials, and have been PROMISED early shipment on other materials which we have long waited for.

The present construction crew consists of 8 men. When our stock of materials permits, this number will be increased to the limit to complete the job as quickly as possible.
