

QUALITY!

It is most important that the quality be high in the plants you use to establish your Mother Block.

It has taken several years of time to isolate and propagate the type of bulb which has given us such amazing performance.

It has required the intelligent direction of competent plantsmen.

It has required the destruction of many thousands of bulbs, not measuring up to the standards we have set.

It has required the expenditure of many thousands of dollars.

At the quoted prices you are getting your planting stock very inexpensively,, when you sum up the cost of producing it for you.
