There's Plenty "Christmas" Right Here

Christmas shopping, a problem, even in normal times, is no "cinch" this year, with shortages in most every line, but this much can be said about this area, 160 miles to the nearest railroad:

Right here in the Brookings-Harbor area, merchants have a much wider selection of goods than can be found in cities many, many times the size of this. This information comes not from local opinion, but from people passing through, who stop for meals, or to spend the night. They claim to be amazed.

Certainly the war has taught people to be practical. Practical gifts, then, are the order of Christmas buying. Nowhere can such purposeful buying be better exercised than right here.

Since Christmas giving is for the spirit of the season, certainly practical things will be much more acceptable, especially at a time like this. What could be more acceptable than something for that new house, in way of small pieces of furniture, or lighting fixtures?

What, if a dress could not be bought, would any woman think of some piece goods, that she might make a dress more to suit individual tastes? Practical gifts, then, can be solved no better anywhere in the country, than right here in this area.

A careful check of Pilot advertising between now and Christmas will convince everyone of this fact. Another fact to remember is to shop early. Perhaps, if your merchant doesn't, at the moment, have some desired article, he still may have time to obtain it.

Reciprocity, such as this, builds a stronger community.. Profits left at home will come back in such ways as new buildings which afford work for many; new businesses which build the community; this does not say anything about the good will which will result.

Have you ever thought about putting your shoulder to the wheel through the local chamber of commerce, to help acquire many of those things you may desire for this community? Try it, please!
