See What We Mean For

WHEN WE TALK ABOUT TRAFFIC

No doubt you have seen a crowded highway with thousands of motorists all trying to reach their destinations as soon as possible. Unless everyone cooperates, traffic slows down and no one makes much headway. It's very similar with us in your telephone company.

In the last year we completed 76,619,313 local and long distance telephone calls. These kept our circuits even busier than the most crowded super-highway. We need your help to keep this record volume of traffic running smoothly. Three simple rules will keep calls flowing and will give you and everyone on your line maximum enjoyment from your telephone:

- * Allow a few minutes' time between calls when you make more than one.
- * Talk only as long as you need to on each call.
- * Ask your youngsters not to monopolize the telephone.

Thank you.
