

# LOOK AHEAD IN 1948

## Make It One Of INDUSTRY!

Today we are embarking upon a new year, a year filled with promise of greater things—of greater hopes. The year, 1948, for this area is far removed from the hectic year of 1947, when our mistakes have brought us to the realization that only through a united effort we will advance.

The coming of 1948 will see expanded effort on the part of all industry to meet the demands made upon it for goods so vital in the economy of the world, not to mention the people of this great nation of ours. Industry of these United States will be called upon

this year for production that exceeded the war effort.

We, the business and professional men of this area, wish to be identified with this nation wide plan. We pledge our earnest efforts to meet the greater demands—we will give a little more of ourselves to that cause of humanity.

We wish, also at this time to thank everyone for the patronage and associations of the past year. They have been delightful, but our hope is that the coming year will see all of us in closer harmony and unity of purpose and effort.
