

Help Them Dream!!

Save those little bodies for useful work

A DIME.....10c.....will buy a cup of coffee, an ice cream cone, and a few small bars of candy—the taste of which lingers but a short time. You do this daily for a week, and you still have gained little except some personal satisfaction.

HOWEVER, you can really get a lot of satisfaction from a dime, over the same period of time, if you heed the call of dimes—to fight that scourge of humanity—infantile paralysis—by dropping them in convenient containers, or by mailing in your dime packet.

THOSE BODIES twisted by this malady may be salvaged—they may realize their dreams of being strong

and useful in our system of society. The cost, you must remember, is terrific for the family so stricken, but a few of us putting our dimes to work will see this job done.

OUR COMMUNITY is not immune to infantile paralysis. It might strike at any time, and then most of us would realize how inadequately we have previously subscribed to this cause. We, the various lumber businesses of this community, wish to take the lead in making this appeal to you. Please help those so afflicted to become useful citizens—think what a few dimes can do—and give—give—give, and then give a little more.
