

Ellsworth Tells Of River Mouth Plan At Gold Beach

ROSEBURG—Improvement of the Rogue river entrance at Gold Beach as a navigation aid has been recommended by the corps of engineers, Representative Harris Ellsworth, Republican, Oregon, stated Saturday.

Twin jetties would be built under the project and the channel cut to 30 feet wide and 13 feet deep at mean low tide.

Channel improvement would also include a turning basin 500 feet wide and 650 feet long, about a quarter of a mile below the state highway bridge over the river.

Cost is estimated by the engineers at \$3,758,700, with an annual maintenance charge of \$160,000, Ellsworth said. Local interests would be asked to pro-

vide land terminal facilities and right-of-way.

A hearing on the project was held at Gold Beach, June 2, 1948. —Sunday Oregonian.
