

HOROSCOPE PREDICTS "TROUBLED" TIMES FOR WORLD NEXT 5 YEARS

This article on United States and its present predicament is calculated by the Science of Astrology. Notes and views by one man's opinion. He prefers to remain anonymous for the present.

Very few boys will escape the army in the next five years as the Horoscope of the U. S. A. shows no peace in that time—a time of trouble this country has never felt since the year of 1776, when the U. S. Horoscope was started.

It shows adverse for ground forces and greatest losses there-by, but will win high gains and victories by air and sea forces. We should put all our money and efforts in these two forces alone, and leave the ground forces to the United Nations. Their greatest power is in ground forces—our and Britain lie in sea and the air.

U. S. and Britain should stand closely together and put all their strength and money and energy into sea and air power, using the only little of the ground. The army and marine corps will fare worst according to the progressed horoscope, as must use the land forces sparingly.

One dislikes to say too much about the war troubles as it looks gloomy and worries people. But we must face it in all its reality, sanely.

I have made a study of this science for 32 years so it is not new to me—I hate to hold back and see so much different opinion and the leaders of our country so divided. Very few agree. They really don't know what to do—on the other hand, astrological science if calculated and read right, would solve many difficult problems which otherwise are kept in the dark.

In the Month of May I figured out the progressed horoscope of the United States and there at the time I wrote down some of the notes and calculation as I figured them—that was before the war started in Korea. I wrote that the U. S. would be in war on June 27—which was only two

days off—starting June 25. And I figured that the end of it would be Jan. 5, 1951, and so it has, for there we found out that we had really lost it, for so we had. We still keep on losing because at the present time the U. S. horoscope shows loss in Korea—so why keep on losing more of our manpower? It is a pity that they do not have a good astrological advisor to guide our country when they are so confused and uncertain on which way to turn.

The leaders seem to all pull in different directions and few do agree. It's about time that we use some sort of science to figure out what moves to make and what action to take, to guide our country. We all are part of it and must do our part. I held back in writing last May what I calculated, thinking that perhaps the U. S. would escape from war or sidetrack war in Korea; but it happened, so now my conscience and intuition tells me not to hold back any longer. I don't guarantee anything that I write but I do the best I can in my calculations and that is all, since I, too, am just human.

U. S. should rely only on air and sea forces, and none or little ground forces, even the marines, for at the present time and for the next five years our weakest forces will be on the ground. In that we will continue to lose heavily as most of the adverse planets of the U. S. Progressed horoscope are ground planets which rule the army and marines. While the air force planets are the most excellent aspect of the chart.

It is too bad and unfortunate that our government does not know what is hidden in the secret force of the stars. It needs advice and correct guidance more than it ever did in its history, since it was founded, back in the year, 1776.

Next to the air forces being best, comes the navy on the list—although it shows plenty of
