

B. P. A. Spent \$16 Million Sum

Construction of Bonneville power administration transmission facilities for the southwestern district during the 1951-52 fiscal year will total about \$16,000,000 on the basis of the department of interior appropriation bill signed by President Truman, today announced W. E. Trommershausen, district manager, Eugene. Power facilities include major 230,000 volt general grid transmission lines wholly or partially in the district, and 115,000 volt facilities serving secondary load centers and connecting Bonneville customers with the Columbia river power grid.

Current fiscal year Bonneville appropriations for the Pacific Northwest total \$72,868,000, including \$46,500,000 for construction, \$21,000,000 for contract liquidation, and \$5,368,000 for operation and management, said Trommershausen. Oregon, Washington, northern Idaho and western Montana are included in Columbia river power grid.

Funds for transmission facilities in the 230,000 volt regional power grid, wholly or partially in the Southwestern district, total about \$14,000,000 for the following lines.

Detroit-Albany line, Detroit terminal, Albany substation additions McNary - Maupin - Detroit

line and terminal.

Detroit-Chemawa line, Chemawa substation and communications Midway-Big Eddy-Maupin-Detroit line, terminal, switching stations Detroit-Gashen facilities.

Southwestern Oregon loop service, including Maupin-Madras line acquisition and conversion, Madras - Redmond - Klamath Falls line, Redmond and Klamath Falls substations and associated communication facilities.

Goshen-Roseburg-Coos Bay 230 kv line (surveys only).

Santiam Valley substation (Lyons).

Appropriations for 115,000 volt transmission facilities and customer service substations serving the principal load centers, total approximately \$2,000,000 for the following projects:

Goshen-Eugene line terminals, Eugene substation additions.

Coos and Norway substation additions.

Goshen-Springfield 115,000 volt line, Goshen terminal and Springfield substation.

Detroit substation.

Toledo substation additions.

McKinley-Gold Beach 115,000 volt line, Port Orford substation, Gold Beach substation.

Lebanon-springfield 115,000 volt line.

Goshen-Lookout Point (Meridian) 115,000 volt line.

Harrisburg substation additions.

Drain substation oil circuit breaker installation.

Construction schedules for these projects will be announced shortly after procurement, manpower and other related problems are resolved. Completion of these facilities will materially strengthen the transmission networks of southwestern Oregon and provide adequate ties to the new hydro generation coming into service at Meridian, Detroit, and McNary projects.
