Egg Scales Water Founts, Feeders

### Here are Four Ways to Protect Your Investment

**1. Keep Drinking Water Pure**  
Give your chicks the added protection of GERMOZONE in the drink. Germozone's effective, antiseptic action destroys many harmful germs such as PUL-LORUM — helps keep water pure. A liquid — mixes instantly, uniformly, in fountain with just a swish of the spoon. One quart is enough for 100 chicks to the end of the growing period. 1-qt. bottle of Germozone, \$1.75; 1/2 gal., \$3.00; 1 gal., \$5.25.

**2. Use Acidox For Coccidiosis**  
Acidox aids in both prevention and control of Bloody Coccidiosis. This disease accounts for three-fourths of all growing period losses. Acidox is easy to use. One quart treats 200 birds for the entire season. 12 oz., \$1.00; 1 qt., \$2.00; 1/2 gal., \$3.50; 1 gal., \$6.50.

**3. Have Leemulsion On Hand**  
Mix it with the mash for chicks at the first symptoms of Colds or Bronchitis. Give relief from distress as early as possible. 4 oz. bottle (sufficient for 100 chicks) 60¢; 12 oz., \$1.25; 1 qt., \$2.50.

**4. Get the Benefits of Tonax**  
Pep up the laggards and insure a supply of trace minerals in the mash. Only 1 lb. per 100 lbs. of mash is required. 2 lb., \$1.00; 6 lb., \$2.65; 25 lb., \$9.50.

Buy the Lea Quality Line

### Feed 'em better with LESS Feed!

These Jamesway flock feeders make it easy for the birds to get all the feed they want without wasting it. The tumbled sides are scientifically designed and built to save feed — as much as one bag in every five! And your birds get fresher feed because it can't lodge in corners and get old and stale.

Come in and let us show you why this line of feeders and other Jamesway poultry equipment is so popular with practical poultry raisers everywhere.

### Making Poultry Pay

— THE DR. SALSBURY'S WAY

Poor production is often the result of insufficient hopper space. Remember, when you use an all-mash diet, allow 32 feet of hopper space per 100 layers. And in grain-mash feeding, provide 10 feet of mash hopper space. And to keep birds peppy and productive, use Dr. Salsbury's Avi-Tab in feed.

Avi-Tab aids vitality and appetites.
