Seven Leagues Ahead

Congratulations, Plywood Plant!

Coming of Brookings of Brookings Plywood Corporation was possibly the greatest thing to happen to all Southwestern Oregon. Its coming made the world sit up and take special notice of the possibilities which are here for the expansion and development.

We Have Need For Your Payroll!

We are proud to be in the same area—moreover, it goes without saying that your coming here has done so much for the economy of Oregon, to say nothing about our own immediate vicinity. Your payroll will help to build all southwestern Oregon. We know you are also aware that payrolls are the life-blood of the nation.

Community Has Big Building Program!

This community, because of your coming, has a big building program ahead for it. We must have hundreds of homes for all the residents who eventually will be sharing our responsibilities. We must improve the appearance of everything about the area, for this will be our home for years to come. Let us share everything!

There's No Substitute For Pictures

What did it say—the old Chinese proverb—"a picture is worth ten thousand words." Maybe that would be under-estimating it, but whatever the answer, there's certainly no substitute for pictures—none.

For years we have made it a practice to record as much as possible, all important things in pictures. In so doing we have always had not only enjoyment, but our friends have also profited.

We Have Cameras, Film, Etc.

While our stock is nothing to compare with any you may find in the larger cities, we do have about the most complete stock of cameras, film, movie kodaks, etc., you can imagine, to supply any needs you may have in becoming an advocate of "telling it in pictures."

If you like movies, you can get your stars best with recording the life of your family. You may add commercial films to your stock so that any evening you may be able to stage "quite a show" for friends.

Make Movies Of Most Events

In this community, we have many events which lend themselves to movies: Azalea Festival, Lily Parade, and dozens of other things which you will always wish you could remember every detail. For further information, call on us for details. You'll never be sorry.

GRANDMA DIDN'T HAVE ANY 'HOME'

It was many, many years ago when Grandpa "courted" Grandma and they planned their home. At that time, while their wants were simple, they found plenty of difficulty in obtaining many of the necessities and comforts they wanted for that home. They couldn't go to one place and get plans, and purchase every item needed in the construction of that home. Grandma knew about housework, about all there was to know. She had never heard of all the appliances we enjoy today—actually believe to be necessities.

Grandma Had Few Conveniences, Either

In those days, they stocked the home with bedding, cooking utensils, furniture, and hunted for a house which they hoped would fit their list of goods. Grandma was up in years, most likely, before she had her own home, one over which she could be a queen.

We Like To Help Everyone Plan A Home!

Today, the bride, and her husband, have it lots simpler—so much handier—so much easier. From the foundation to the finished home, all materials may be found right here under one roof—yes, and many of those "new jangled" appliances which make a woman's work more of a pleasure than Grandma had. Consult us for anything you may need in the building line—for that home you are now planning. It is our belief that you will find about everything to realize it, right here under this one roof. Check this list—

Dimension Lumber, up to 45 feet long, if needed!

Rough and Finished Lumber of All Kinds

Paints — Wiring — Plumbing — Windows

Doors — Roofings — Electrical Appliances

Interior or Exterior Finish of Any Type

Plywood in many finishes, such as:
