Milk Price To Be Increased

The State Bureau of Milk Control announced a two cent a quart hike in the price of milk in the Humboldt-Del Norte marketing area beginning October 1st.

This increase is an automatic increase that goes into effect for Humboldt-Del Norte the first of October and is reduced April 1st of each year. Milk can be produced in the spring and summer months much more economically than during the winter months; because of the abundance of grass during the summer period. This two cent increase goes to the milk producer because it would be too costly for him to produce winter milk if it were not for a higher paying price during the winter months.
