A surprisingly large part of the money you pay for telephone service goes right out in taxes. In addition to the federal excise tax which we collect from you, we also pay a variety of taxes which benefit federal, state and local governments. On an average, these taxes add up to more than 30% of your telephone bill.

Taxes are necessary—you couldn't run a city, state or nation without them . . . But, they do mount up!

When you pay your next telephone bill remember the large part of it that goes for taxes.
