Information On Blood Typing Reaches V.F.W.

Some very valuable and informative information on the blood typing plan being pursued by the V.F.W., Auxiliary and Rotarians, has reached their committees from the State Board of Health through the offices of the county health nurse, Mrs. Dorothea Miller of Gold Beach. Because of its importance involving the saving of human suffering and life, the committee will take plenty of time to get properly lined out before beginning the program. The exceptional interest on the part of the public and the profession, both locally and "outside," convinces the promoters of the probability of considerable extension into other areas.
