Nothing is as good as STA-DRI for stopping water and beautifying masonry. STA-DRI is the inorganic mineral coating for all masonry, that stays white when wet, is not subject to weather-wear, organic deterioration, disintegration, rubbing off or flaking and is stone-like in resisting erosion.

Newcomers to the masonry waterproofing field say "new", "never before" and make claims that STA-DRI has exceeded for years with hundreds of thousands of satisfied users to prove it. Only STA-DRI dares to advertise and support the claim that IT WILL HOLD A WALL OF WATER NINE FEET HIGH WITHOUT LEAKAGE. Containing a mold and mildew inhibitor, STA-DRI comes in white and a variety of colors at no extra cost. Don't be satisfied with "second-raters" or take something that's "just as good". Demand the package that says "Best by Test". Demand STA-DRI.
