Concert Slated At Crescent Tuesday

John Sebastian, harmonica virtuoso, and Dorothy Jarnac, dance humorist, will be starred in the second Community Concert, to be presented Tuesday evening at Crescent-Elk Auditorium. The concert will open at 8:15.

The two are regarded as being among the brightest of the rising stars on the concert stage. Mr. Sebastian is credited with establishing the harmonica as a concert instrument, and he has a long list of triumphs behind him. He records for RCA-Victor.

Miss Jarnac became a dancing star overnight in the Broadway hit "Bloomer Girl". After that she began work on her present form of expression, the narrative dance, and is probably the greatest exponent of it. She has collaborated with Mr. Sebastian for several years now.

Albert Malver accompanies the two at the piano.

Four Men Arrested For Fighting Sunday

Four men were arrested Sunday by Police Chief Bud Cross after being involved in a fight on Chetco avenue.

Arrested were Robert Sutton, William Lynch, and two brothers, Robert Eugene Scott and Ronald M. Scott.

The four appeared before Municipal Judge Hans Nelson and posted \$25.00 bail apiece.

Pointers Listed To Tell Ducks

Knowing what you're aiming at before you pull the trigger is more important this year than ever for the Oregon duck hunter.

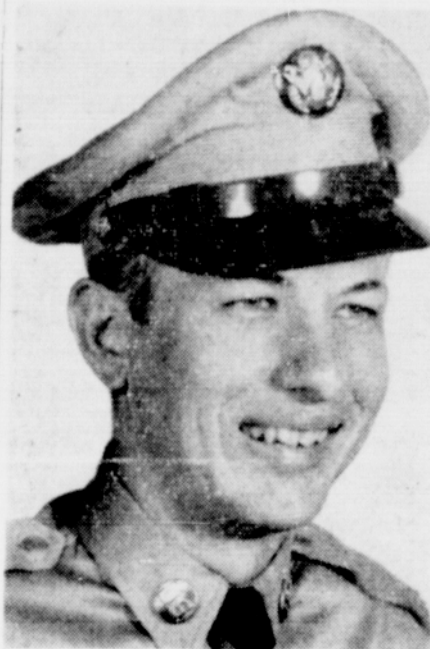

Among the changes in waterfowl hunting regulations this year is an increase in the bag limit from the 8 ducks per day in 1952 to 11 this season, provided that 4 of the 11 be pintails or widgeons. The burden of identification of the "bonus" ducks is up to the hunter.

Jay B. Long, of the fish and game management department at Oregon State college, has some tips that may prove helpful in this identification. He says, fortunately, the pintail and widgeon are the only common surface-feeding ducks having both blue bills and bluish feet. This makes "in-the-hand" identification easy.

In the air, Long says, the pintail may be identified by its long neck, sharply pointed wings and general streamlined form. Widgeons in the air are best identified by their whistling call and white bellies and forewings.
