

Bills Introduced For Improvements At Rogue Mouth

Bills were introduced simultaneously in both houses of Congress this week to authorize improvement of the Rogue River at Gold Beach. The bills were introduced by Guy Cordon in the Senate and Harris Ellsworth in the House.

Cost of the proposed project is estimated at \$3,700,000. Included in the work would be the construction of two jetties at the mouth of the river, the construction of a 13-foot deep channel

from the mouth of the river to the highway bridge, and a turning basin 500 feet by 650 feet just below the bridge.

The board of engineers said the proposed improvements would facilitate the development of timber resources in the area and provide a home base for about 40 fishing craft, as well as an operating base for an equal number. It would also provide the only haven along a treacherous stretch of coast.

A number of Gold Beach people have protested the projects, principally resort owners and sportsmen, who wish to keep the Rogue as an attraction for tourists and fishermen. Such protests, however, were outweighed in the minds of army engineers, by the economic gains which would be made if the river mouth is developed.

Nayborhill News

By ELSA RAVEKES

The Nayborhill folks gave Mr. and Mrs. Percy Hanks a house warming at their new home Sunday evening. I'm afraid if it had been any other house to have been warmed there wouldn't have been room for all the guests.

Several games were played (sitting games) and refreshments were served.

Mr. and Mrs. Hanks were presented with a "Kumaska" Camellia bush for their yard.

Those names signed on the guest book were Mr. and Mrs. Pete Schmidt, Mr. and Mrs. T. Harness and son Doug, Mrs. Allie Weaver, Mr. and Mrs. C. Weaver and family, Mr. and Mrs. Jess Porteuw, Mr. and Mrs. Charles Behee and son Greg, Mr. and Mrs. John Phillips and daughters, Mr. and Mrs. Chet Gragg and daughter Patty-Jo, Mr. and Mrs. Don McCarion, Mr. and Mrs. Wm. Stewart, Mr. and Mrs. H. Hale and family, La Rue Ziegler, Mr. and Mrs. Pete Olson, Mr. and Mrs. Ray Reeser, Mr. and Mrs. Lee Drorbaugh, Mr. and Mrs. Wm. Eickhoff, Mr. and Mrs. Ed Ravekes and Mr. and Mrs. Carl Mason.

Mr. and Mrs. Bud Stotenberg and son Barry are new neighbors on the hill. They have purchased the former residence of Mr. and Mrs. P. Hanks.

Lee Drorbaugh has had quite a spell of illness this past month, but is now back at work.

Mr. and Mrs. Jess Porteuw have purchased a new home north of town. We will be sorry to lose them. They are the kind of people we like to keep here on Nayborhill.

Mrs. Doris Seaver was a visitor at the Mr. and Mrs. Carl Mason home for a couple of days. Mrs. Seaver is Carl's sister and lives at Florence, Oregon.

Mr. and Mrs. Percy Hanks, Mr. and Mrs. Chet Gragg and Mr. and Mrs. Ray Reeser were dinner guests Tuesday evening of Mr. and Mrs. Lee Drorbaugh.

A meeting was held at the home of Mr. and Mrs. William Eickhoff Thursday evening by the quilt committee. Those present were Mr. and Mrs. Milton Foster, Mr. and Mrs. G. Jagers, Mr. and Mrs. Fred Gustafson, Mr. and Mrs. I. Wegle and Mr. and Mrs. Ed Ravekes.

That little flu-bug that has been flitting around Nayborhill finally caught up with Lona McCarion.

Mr. and Mrs. Ed Ravekes visited with Mr. and Mrs. H. Cameron and son Sunday. The Camerons live in the Dawson tract or Harris Flat.

All of the good people don't live in Nayborhill it seems. Bill Brown and wife Peggy were right there when Percy and Mary Hanks had moving to do. Bill helped move furniture and Peggy brought over the dinner all cooked for the working crew.

Mr. and Mrs. Chet Gragg have as their guest Mrs. Nellie Webb.

County Agent Says Wax Plant Nearer; Farm Magazine Ready

By KENNETH W. PRIEST

Curry County Extension Agent

The winter issue of Oregon State college's new farm magazine, "Oregon's Agricultural Progress," is just of the press. This new farm magazine may be obtained by stopping in to the extension office or drop us a card or a phone call and we will see that this new farm magazine is mailed to you as each issue comes off the press. The winter issue includes a great many practical research features which you will find informative and useful. For example there will be a spring spray chart, a round-up story describing the important points in handling lotus or Birdsfoot trefoil which is a long-loved winter hardy non-floating legume. The story of nematodes is told mostly by pictures since that is the best way to identify their damage. The record of two cattle feeding stories will feature suggestions for lowering feed costs, especially the essential proteins.

The short article includes a new one-shot method of curing sheep pink-eye. How much grain you can replace with molasses in a poultry ration. How to increase blackberry size just by spraying them with a certain hormone and a description of a new food variety being released by the experiment station.

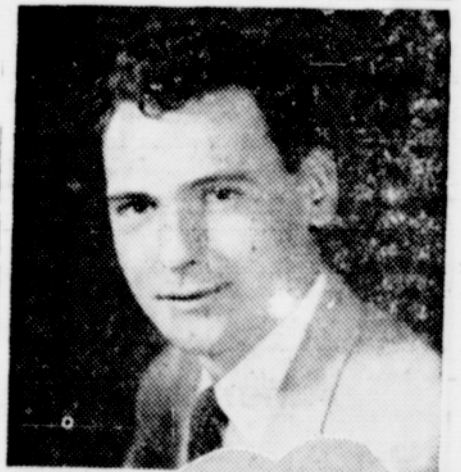

In the economic information section you will find suggestions on how to handle this year's huge barley crop that is sure to come, plus practical farm outlook information for dairymen, cattle, hog and poultry producers and wheat.

grass seed, and strawberry growing. All in all, it is a report on family research information that I am sure you will not want to miss. The new farm magazine is written in a popular vein and is not highly technical, taking weeks of reading just to understand what is written in this magazine.

Commercial production of wax from Douglas fir bark is now one step closer with the conclusion of a new option agreement between the State Board of Forestry and the M. W. Kellogg Company of New York. The Kellogg Company will undertake an 18 months' pilot plant investigation of the state-owned bark extraction process. Whole scale production must of course await results from these pilot plant studies as well as intensive testing in actual use.

But the Kellogg Company anticipates a favorable future for Douglas fir wax extraction, giving Oregon another use of the products from one of its major industries. If found satisfactory, a commercial plant will be built somewhere in Oregon, if a market for three million pounds of wax annually is assured and if the product developed in pilot plant operation bears out preliminary cost estimates.

Reach that buyer through a Pilot Classified Advertisement.

Mrs. Webb is Chet's mother and her home is at La Grande, Ore. Mr. and Mrs. Eric Reuterer and son accompanied Mrs. Webb from Sixes, Ore., last Sunday.

That's A Fact

What A Man!

ALMOST EVERYBODY KNOWS THAT BENJAMIN FRANKLIN SAID: "A MAN MAY, IF HE KNOWS NOT HOW TO SAVE AS HE GETS, KEEP HIS NOSE TO THE GRINDSTONE."

BUT WHO KNOWS THAT BEN...

- INVENTED THE MOUTH ORGAN
- INVENTED THE ROCKING CHAIR
- WAS THE CHAMPION SWIMMER OF HIS DAY
- DEVELOPED THE FIRST VENTILATION SYSTEM
- WAS THE FATHER OF MODERN DENTISTRY?
