**Dodge Announces Contest To Mark 40th Anniversary**

To draw attention to its 40th anniversary as a manufacturer of automobiles, Dodge has announced plans to launch a nationwide contest which will offer grand-prize winners two-week vacations with double their pay and other major awards.

C. Ed Dempsey said the contest will run from February 8 until midnight March 29.

A grand-prize winner every day for the 40 days the contest will run will have a new 1954 Dodge placed at his or her disposal, including gas and oil, for the "two-weeks away with double pay" period.

In addition to double pay, grand-prize winners will have all their transportation, meals and hotel accommodations paid by Dodge and be given an extra \$500 in cash to save or spend as they please.

The two-week vacation is for two people, with the double-pay being based on the one whose salary or wage is the higher. Additional prizes totaling \$10,000 will be awarded to other than grand-prize winners.

Contestants will be eligible for the contest, Dempsey said, by visiting their nearest Dodge dealer. The dealer will furnish them with an entry blank upon which they will be asked to complete in 25 words or less this sentence: "I would like to take my vacation in a 1954 Dodge because . . ."

The entry blank may be completed and left at the dealership, or taken home by the contestant for completion and then mailed to the contest's headquarters.

February 1-7 is the sixth annual national children's dental health week. How are your children's teeth?

**INSULATION PLUGS LEAKS IN YOUR FUEL POCKETBOOK**

By Your Heating Counselor

There are plenty of ways to save heat and—with fall days and nights becoming more and more chilly—here's a check list to help find whether you're getting top value from your fuel dollar.

- You probably aren't unless you:
- 1—Keep your home fully insulated; that means insulating material in the walls and attic as well as the addition of storm doors and storm windows all around the house.
  - 2—Replace caulking that has dried out and fallen from cracks and crevices around the window frames, door-frames and chimney.
  - 3—Keep your windows properly puttied and tight-fitting.
  - 4—Remember to close the doors of your attached garage.
  - 5—Replace worn weather stripping.
  - 6—Burn a good grade of fuel.
  - 7—Provide sufficient combustion air for your heating plant. A nearly air-tight furnace room or faulty blower can reduce your heating plant's effectiveness.
  - 8—Plug air leaks in your furnace walls. (You can locate them by holding a lighted candle near the furnace. Leaks in the walls will draw the flame toward them.)
  - 9—Keep the damper closed when the fireplace is not in use.
  - 10—Make certain that radiators,

registers and cold-air returns are not blocked by drapes, rugs or furniture.

- 11—Close bedroom registers and radiators at night.
- 12—Turn the thermostat back when airing the home during house-cleaning tasks.
- 13—Make certain that the ash-pit door closes tightly if you have a coal-burning furnace.
- 14—Keep winter air conditioner filters clean always.
- 15—Set the thermostat back to 60 or 65 degrees before retiring.

Those 15 steps will help insure top fuel economy at the cost of only a few minutes of time each day.

**The Question Box**  
Dear Counselor:  
I want to install a winter air conditioner in my new home, now in the final planning stage. Does that mean I have to burn coal?  
Mr. J. W. D., Omaha

The answer to Mr. J. W. D.'s question is a decided "no." Heating contractors can supply either oil, gas or coal-burning winter air conditioners.
