LETTER TO EDITOR

It seems that I read an item in a recent issue of the Pilot where some sort of an appeal is being made for this community to get behind a contemplated "Scout Building" for the use of the boy AND girl scouts of this community.

It also seems that it was about two days or so after "pitching my teepee" in these parts (five years ago) that I first heard some mention of a scout building.

If this is correct, then these kids have been holding the sack for quite awhile—to use a popular colloquialism. Obviously, of this condition continues, some of these kids will have scouted into their uniforms and scouted out of them still holding the sack—and yet—no "coons".

Devoting any time to this project on my part is simply out of the question for the present.

If a committee is not organized immediately to get the building started—and completed, then I will gladly offer some suggestions to Mr. Page—Mike Page, that is, to spark the project.

A. De Phillips.
