

New Ford To Go On Display At Dunning Motors

Ford will introduce an entirely new line—the high styled Fairlane series—as the leader of its four lines of 1955 passenger cars to be shown in 6400 dealers' showrooms across the nation on Friday, Nov. 12.

Modern styling inspired by Ford's new Thunderbird personal car distinguishes the new Fords. Retaining definite characteristics which have won Ford style leadership, the 1955 Fords also have a wrap-around windshield and a new lower silhouette. The Crown Victoria—a new model—is the first Ford sedan under five feet in over-all height.

Ford, which offered the first V-8 engine in the low price field in 1952 and has built 14 million since, introduces for the first time three new engines.

A high compression Y-block V-8 engine of 272 cubic inch displacement and an 8.5 to 1 compression ratio.

A powerful y-block engine of 272 cubic inch displacement and a 7.6 to 1 compression ratio.

An improved 6 cylinder I-block engine of 223 cubic inch displacements and 7.5 to 1 compression ratio.

Dual exhausts, which provide extra power, are standard on all Fairlane V-8 and station wagon models.

Most outstanding of the new Fairlane models are the two

FOR WHAT IT'S WORTH

By CLIFFORD P. ROWE

Considerable discussion has been going on in my home town recently concerning the problems arising from congestion of traffic on the highway east of town. Having traveled that route at a snail's pace for the past several years, I am certainly in sympathy with those who feel that something should be done about it. In return for my support on this subject, I would like some assistance with a problem of my own.

I have come to realize of late that all piling of traffic is not confined to highways. In my own home, a situation has developed which, if not remedied soon, threatens to disrupt the entire household. Tempera, which so far have been held under control could at any moment erupt into a display of fireworks which would outdo any Fourth of July celebration.

The problem to which I refer has grown out of the increasing bathroom traffic since the junior Miss started to worrying about hair-dos and the lad through some miracle, discovered that a comb

Crown Victorias which are only 58.2 inches high, 2.4 inches lower than the 1954 Fords. These hard-top models introduce a completely new styling idea—a chrome arch which extends over the top like a tiara. One Crown Victoria model has a transparent plastic roof over the drivers compartment while the other has an all-steel roof.

is an important tool in the grooming process.

There was a time when I could shave in peace. The wife and I had worked out a system of shifting from mirror to basin in such a manner as to bring only occasional collisions. Today, however, I never know when a blue-eyed visage sporting a pony tail may bob up to replace the homely image in the mirror to which I have grown accustomed these many years. Or again I may be forced to step aside, with electric razor idling, as Junior parts a head of hair which by its comparative luxuriance ruins my entire day.

Unsuccessful attempts have been made at setting up a time schedule. However, the call to breakfast seems to be the only guide accepted by anyone; and as a

result the bathroom suddenly resembles Union Station at train time of the ladies' clothing counter at a fire sale.

One—solution, from a personal standpoint, might be for me to grow a beard. This, however, runs into a complication right at the start. While I am definitely losing hair on the top of my head, the good wife resolutely refuses to allow me to make up for the deficit by permitting it to grow on my face.
